Amt(\$)	Root Cause of Monetary Loss	Root Cause Description	Mitigation Strategy	Brief Description of Mitigation Strategy and Anticipated Impact
\$15,080M	Inability to authenticate eligibility: data needed does not exist	Approximately \$15 billion, or 91%, of EITC overclaims are from the inability to authenticate eligibility. This includes errors with the inability to authenticate qualifying child eligibility requirements and taxpayer income misreporting.	IRS will continue examinations, math error notices, return preparer initiatives, etc. IRS will continue outreach/education programs, and work with Treasury on legislative proposals to improve compliance and reduce overclaims.	Reduce taxpayer filing errors, educate taxpayers and paid preparers on the law and common filing errors.
\$963M	Other reason	Approximately \$1 billion, or 9%, of overclaims are from program design limitations. Errors caused by program design occur when information needed to confirm payment accuracy is not available at the time the return is processed.	IRS will continue current efforts such as examinations, document matching, criminal investigation, etc. IRS will also continue outreach/education programs, and work with Treasury on legislative proposals to improve compliance and reduce overclaims.	Reduce taxpayer filing errors; educate taxpayers and paid preparers on the law and common filing errors.

Monetary Loss - Monetary loss to the Government includes amounts that should not have been paid and in theory should/could be recovered.
