FY 2022 Overpayment Amount (\$M)* **\$17,820**

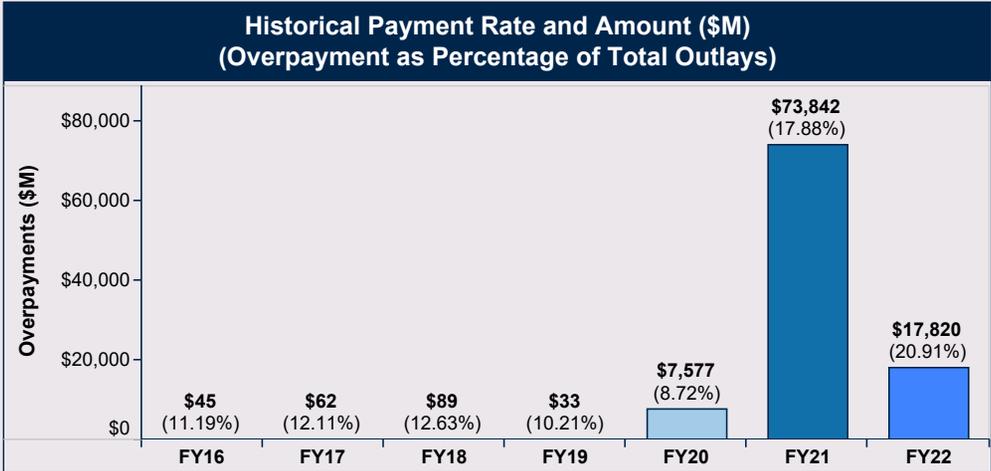

*Estimate based a sampling time frame starting 7/2021 and ending 6/2022

DOL
Employment & Training Administration - Federal State Unemployment Insurance

Brief Program Description & summary of overpayment causes and barriers to prevention:

The UC programs provide temporary, partial wage replacement to eligible workers. Programs included in the monetary loss calculation include the traditional state UI, UCFE, UCX, EB, EUC08 benefits, and PEUC and FPUC CARES Act benefits. The top three root causes for OPs in the UC programs are BYE, Work Search, and Separation Issue IPs. Barriers to prevention include (1) statutory requirements, based on sound policy, to provide due process; (2) states must balance legal requirement to pay benefits quickly with requirement to prevent fraud and ensure equitable access; (3) 53 jurisdictions with different IT systems, cybersecurity, ID verification, and fraud solutions/vendors; (4) increasingly sophisticated/evolving fraud schemes.

Discussion of Actions Taken in the Preceding Quarter and Actions Planned in the Following Quarter to Prevent Overpayments

ETA is focused on strengthening UI program integrity, making it a top agency priority. ETA develops and oversees a robust and dynamic UI Integrity Strategic Plan, which continuously evolves and includes innovative strategies to address emerging fraud schemes and UI program risks. The Department is working to enhance its existing UI fraud risk management processes in alignment with GAO's Fraud Risk Framework. The Department continues to explore, research, identify, invest in, and provide states with new tools, resources, strategies, and guidance to help states combat the continually changing and newly emerging types of sophisticated fraud impacting the UI system. ETA's efforts to prevent overpayments include providing timely guidance, technical assistance, funding, and oversight to states related to proper administration of all UC programs. For example, ETA announced funding opportunities to states to reduce improper payments, prevent and detect fraud, strengthen ID verification, and recover overpayments. The Department is also making available to states government-operated ID verification systems developed by the GSA to verify identities online through Login.gov and by the USPS to verify identities in person at participating USPS retail locations nationwide.

Accomplishments in Reducing Overpayment		Date
1	ETA issued TEN No. 24-22, announcing the release of a Tiger Team promising recommendations resource on WorkforceGPS.	Apr-23
2	ETA issued TEN No. 25-22 announcing release of a new toolkit that describes RPA as a promising technology solution and gives information on how using RPA in state UC programs can be effectively leveraged by states.	Apr-23
3	ETA issued UIPL No. 09-23 providing FY24 SQSP guidance, including a focus on ensuring UI program integrity by assessing and evaluating fraud risks, implementing, and maintaining sufficient controls to effectively mitigate the likelihood and impact of fraud, and reducing IPs.	Jun-23

Payment Integrity Scorecard

Reporting Period Q3 2023

Goals towards Reducing Overpayments	Status	ECD	Recovery Method	Brief Description of Plans to Recover Overpayments	Brief Description of Actions Taken to Recover Overpayments
1 ETA participated in the 2023 NASWA UI State Information Data Exchange System (SIDES) Seminar which highlighted promising state practices focusing on improving UI integrity and SIDES exchange implementation. Workshop topics included exploring UI IP rate and root causes, implementation of SIDES exchanges, incorporating SIDES into UI IT modernization projects, and roundtable discussions.	Completed	Apr-23	1 Recovery Activity	Provide technical assistance to states on overpayment recovery methods and best practices and find opportunities to streamline state recovery efforts.	ETA and the UI Integrity Center continue to work with states to provide recommendations to improve OP recovery efforts.
			2 Recovery Activity	Continue to work closely with federal law enforcement and banks/financial institutions to streamline recovery efforts and facilitate the return of UI funds.	ETA continues developing a SOP to ensure that funds recovered through the civil prosecution of COVID-19 related fraud is returned to the appropriate trust.
2 ETA, the UI Integrity Center, and Treasury's Bureau of Fiscal Services, Office of Payment Integrity, met to discuss options for incorporating Treasury's Do Not Pay and Payment Integrity Center of Excellence datasets into the Integrity Data Hub. This has the potential to make Treasury's data available to states for cross-matching UI claims to prevent improper payments and fraud and aid states in making proper UI eligibility determinations.	On-Track	Dec-24	3 Recovery Activity	Explore additional funding opportunities to improve overpayment recovery and/or the potential need for additional guidance regarding overpayment recovery.	ETA is monitoring the use of grant funds provided to support states with fraud detection and prevention, including identity verification and overpayment recovery activities, and assessing the potential need for additional guidance regarding overpayment recovery.

Amt(\$)	Root Cause of Overpayment	Root Cause Description	Mitigation Strategy	Brief Description of Mitigation Strategy and Anticipated Impact
\$6,673M	Overpayments within agency control that occurred because of a Failure to Access Data/Information Needed.	State agency identified issue but didn't properly follow procedures/complete forms and/or provided incorrect info - didn't resolve issue. Or result of 3rd-party error/incorrect info. OPs originate from state agency administration issues, not Federal.	Audit - process for assuring an organization's objectives of operational effectiveness, efficiency, reliable financial reporting, and compliance with laws, regulations, and policies.	Hold states accountable through performance measures and require corrective action for not meeting targets; provide oversight and TA; share best practices; enhance training/resources to improve UC knowledge and reduce IPs due to state agency errors.
\$449M	Overpayments within agency control that occurred because of an Inability to Access the Data/Information Needed.	State agency had detected payment error as result of crossmatch with state or national files and had taken official action to establish overpayment for recovery before investigation or state was in the process of resolving the error prior to sample selection.	Predictive Analysis - A data analytics technique used to prevent Improper Payments. It uses predictive capabilities to identify unobserved attributes that lead to suspicion of Improper Payments based on known Improper Payments	Promote state strategies to improve use of cross-matching and data analytics to prevent and detect fraud and provide enhanced crossmatches for states' use to ensure UI benefit payments are only made to eligible individuals and reduce IPs.
		Statutory barriers, established for good policy reasons require payments "when due", prohibiting states from suspending payments until official state determination that payments are no longer due. UI is not administered at the Federal level.	Training – teaching a particular skill or type of behavior; refreshing on the proper processing methods.	Provide states access to effective tools, technology, resources, and solutions; offering states enhanced technical assistance to prevent/detect IPs and fraud and to reduce IPs due to issues that were not detectable by normal procedures.

State UI agencies entered the Pandemic after experiencing the lowest claims workload, and thus lowest administrative funding, in 50 years, which significantly impacted resources and staffing levels. Many states are also challenged by antiquated UI IT systems. To add further complication to state UI program operations, the frequency and complexity of fraud attacks against state UC programs increased significantly during the COVID-19 pandemic. States were forced to respond to and address relentless and sophisticated fraud attacks that continued to evolve to circumvent the prevention and detection tools and strategies states had in place. States continue to focus their attention and available resources on reducing backlogs accumulated from high claims volume and combatting the substantial increases in UI fraud. Many states have implemented new or updated existing fraud prevention and detection tools, including ID verification solutions. ETA has actively and aggressively continued to address fraud and improper payments in the UC programs by providing support to states through guidance, technical assistance, and additional funding opportunities. ETA also provides targeted technical assistance to states through Tiger Teams to address state-specific, unique challenges and/or collect best practices to prevent and detect fraud, promote equitable access, reduce backlogs, and ensure the timely payment of benefits. ETA has and continues to make UI program integrity a top priority.
